

SPR PACKAGING

CASE STUDIES | TX202103

PROBLEM

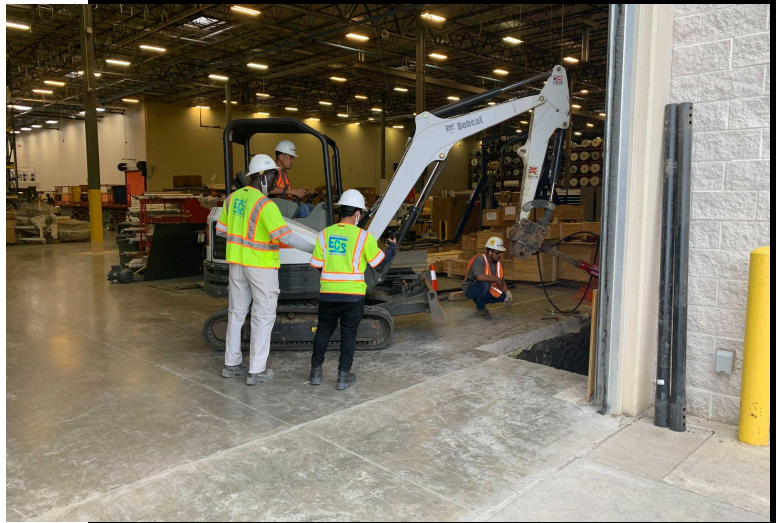

SPR Packaging out of Rockwall, TX is a flexible packaging company founded in 2006. In 2021 they decided to expand due to growth within their company. After having trouble getting a concrete drill rig close enough to the exterior wall to support the required columns they called Ram Jack.

With the help of Joe Hill Engineering, the team came up with a plan to support the columns and help SPR expand without issues.

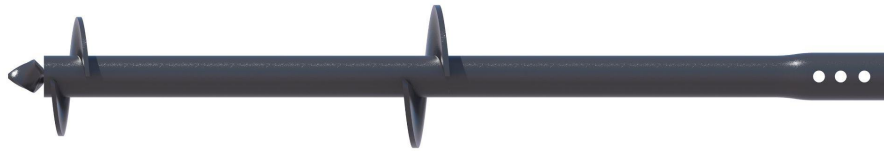

SPR PACKAGING

PROPOSED SOLUTION

The project was to install four columns to help support an addition for a mezzanine in an existing building. Ram Jack decided to install 3 1/2" helical piles to support the required columns.

OUTCOME

Ram Jack installed (12) 3 1/2" helical piles to support (4) columns for the mezzanine on the inside of the exterior wall where a concrete drill rig failed. The job was set to be done in two day but the Ram Jack team was able to finish in one.
